Professional Summary

AI-focused Full-Stack Developer and B.Tech Computer Science student with hands-on experience building and deploying AI-powered SaaS products and production-style web applications. Experienced with React, TypeScript, JavaScript, Python, Supabase, PostgreSQL, REST APIs, webhooks, Git, Vercel, AI agents, prompt engineering, and Gemini AI. Built and deployed applications for resource booking, AI-generated project briefs, and AI-assisted software requirements analysis. Earned four hackathon awards, including 4th Place, Community Choice Award, and two Hidden Engagement Awards, with cash prizes.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, C++

Frontend: React, HTML5, CSS3, Tailwind CSS, Vite, Responsive Web Design

Backend & Database: Supabase, PostgreSQL, Supabase Auth, REST APIs, Webhooks

AI & Generative AI: Gemini AI, Generative AI, AI Agents, LLMs, Prompt Engineering, AI Automation

Developer Tools: Git, GitHub, Vercel, n8n, TestSprite CLI

Other Technical Areas: Full-Stack Development, Role-Based Access Control, SaaS Architecture, IoT, Microcontrollers, Automation, API Integration

Experience

Independent AI & Full-Stack Developer

2025 – Present

Self-Directed Product Development

Kolkata, India

- Designed, developed, and deployed multiple production-style web applications and SaaS products focused on AI, productivity, booking workflows, and software requirements analysis.
- Built full-stack applications using React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Supabase Auth, REST APIs, webhooks, Git, and Vercel.
- Integrated AI capabilities including Gemini-powered analysis, AI-assisted content generation, AI agents, prompt engineering, and workflow automation.
- Implemented authentication, role-based access control, dashboards, database-backed workflows, responsive interfaces, and API integrations across projects.
- Participated in multiple software hackathons and earned four competitive awards with cash prizes, including 4th Place and Community Choice recognition.

Projects

SpecGuard AI

2026

React, TypeScript, Vite, Tailwind CSS, Supabase, Gemini AI, Vercel, TestSprite CLI

- Built an AI-assisted software requirements review workspace that analyzes product requirements before development to identify ambiguity, missing acceptance criteria, inconsistent flows, and weak edge cases.
- Implemented PRD upload, demo project loading, engineering review workflows, issue categorization by severity/type, version history, and report export in PDF, Markdown, and JSON formats.
- Integrated Gemini AI for requirement analysis and Supabase for application data persistence and authentication-related infrastructure.
- Used TestSprite CLI to verify core frontend flows including authentication, dashboard interactions, demo loading, review actions, and report export.

tRIAL-cLIENTS

2026

React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Supabase Auth, Vercel

- Built and deployed an AI-powered SaaS platform that generates realistic client project briefs to help developers and designers practice real-world project delivery.
- Implemented role-specific Developer and Designer tracks, realistic project constraints including budgets, timelines and technology requirements, and a project workspace for managing generated briefs.
- Developed authentication, persistent project history, credit and reward mechanics, responsive UI, and production deployment using Supabase and Vercel.

MeetOps

2026

React, TypeScript, Vite, Tailwind CSS, Supabase, PostgreSQL, Vercel

- Built a centralized meeting-room and shared-resource booking SaaS for organizations to manage availability, bookings, approvals, and scheduling conflicts.
- Implemented authentication, role-based access control, dashboards, resource management, booking creation, conflict detection, approval workflows, booking management, notifications, and search/filter functionality.
- Designed booking validation logic to prevent overlapping, invalid, and out-of-hours reservations while supporting multiple booking states and administrative workflows.
- Deployed the application as a live web product and used the project as a foundation for hackathon submissions and automated QA validation.

Hackathon Achievements

- **4th Place – TestSprite Hackathon** Mar 2026
- **Community Choice Award – Build with MeDo Hackathon** Apr–May 2026
- **Hidden Engagement Award – TestSprite Hackathon** Apr 2026
- **Hidden Engagement Award – TestSprite Hackathon** Jun–Jul 2026
- Received cash prizes for all four hackathon awards.

Education

Dr. Sudhir Chandra Sur Institute of Technology & Sports Complex	Jul 2025 – Jul 2028
<i>Bachelor of Technology (B.Tech), Computer Science and Engineering</i>	<i>Kolkata, India</i>
Central Tool Room & Training Centre (MSME), Government of India	Aug 2021 – Jul 2024
<i>Diploma in Mechatronics, Robotics and Automation Engineering</i>	<i>Kolkata, India</i>

Certifications

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** – Oracle, 2026
- **5-Day AI Agents Intensive Course with Google** – Kaggle, 2025
- **Introduction to Generative AI Studio** – Simplilearn, 2026
- **Introduction to Prompt Engineering with GitHub Copilot** – Microsoft, 2025
- **Responsible AI with GitHub Copilot** – Microsoft, 2025
- **AWS – Solutions Architecture Job Simulation** – Forage, 2026
- **Python Coder** – Kaggle, 2025
- **Internet of Things (IoT)** – Central Tool Room & Training Centre (MSME), Government of India, 2024
- **Workshop on Cyber Security** – Codaphics, 2024
